

To Whom it May Concern

Your patient Marry(19-12-2020), has voluntary joined our breast milk donation program and her generous donation of breast milk will be supplied to preterm babies and support infants of mothers that cannot supply breast milk themselves.

She has confirmed that she has not had any blood transfusions within the last 12 months, she has not been prescribed any medication and is not taking any recreational drugs that could affect the quality of the breast milk.

She has confirmed that she intends to breast feed her own infant and that only surplus milk will be donated.

We are writing to ensure that you are aware of this commitment and to ask you to notify us and the mother should you have any concerns about her participation in our breast milk donation program.

Thank you for your consideration of this matter

Yours Sincerely

Phil Cox
